

Test Case ID	Title	Precondition	Steps	Expected Result	Actual Result	Status
TC_01	Verify user can navigate by clicking sample banner	User is on homepage	1. Click on a sample banner	User is redirected to a new page	User is redirected to a new page	PASS
TC_02	Verify user can return to homepage after clicking sample banner	User has clicked on a sample banner	1. Click on a sample banner 2. Try to return to homepage	User can easily return to homepage (e.g. via navigation or button)	No clear option to return to homepage	FAIL
TC_03	Verify user can scroll down the page	User is on any page with scrollable content	1. Open a page 2. Scroll down the page	Page scrolls smoothly and all content is accessible	Page scrolls smoothly and all content is accessible	PASS
TC_04	Verify user can easily navigate back to top while scrolling	User is on any page with scrollable content	1. Open a page 2. Scroll to the bottom 3. Try to navigate back to top	User can quickly return to top (e.g. back-to-top button or sticky navigation bar)	No back-to-top option and no sticky navigation bar; user must manually scroll	FAIL
TC_05	Verify promotional banner is clickable	User is on homepage	1. Open homepage 2. Click on "20% off on clothes" banner	Banner is clickable and redirects user to another page	Banner is clickable and redirects user to another page	PASS
TC_06	Verify promotional banner redirects to correct product page	User is on homepage	1. Open homepage 2. Click on "20% off on clothes" banner	User is redirected to a relevant category or product listing page (e.g. discounted clothes)	User is redirected to the homepage	FAIL
TC_07	Verify subcategories are displayed after selecting a category	User is on navigation menu	1. Click on a category (e.g. Accessories) 2. Move cursor away from the category 3. Observe subcategories	Subcategories are displayed correctly and do not cover main categories	Subcategories are displayed correctly	PASS
TC_08	Verify subcategories do not overlap main categories after selecting category	User is on navigation menu	1. Click on a category (e.g. Accessories) 2. Keep the cursor positioned directly over the selected category 3. Observe subcategory display	Subcategories are displayed without covering the main categories	Subcategories overlap and cover the main category, making it not fully visible	FAIL
TC_09	Verify Quick View opens when selecting a product	User is on product listing page	1. Open product listing page 2. Click "Quick View" on a product	Quick View popup opens for the selected product	Quick View popup opens	PASS
TC_10	Verify Quick View displays correct product information	User is on product listing page	1. Open product listing page 2. Select a product (e.g. black t-shirt) 3. Click "Quick View" 4. Compare selected product with displayed product	Quick View displays the same product that was selected	Quick View displays a different product (e.g. white t-shirt)	FAIL
TC_11	Verify product details page opens when selecting a product	User is on product listing page	1. Open product listing page 2. Click on a product	Product details page opens	Product details page opens	PASS
TC_12	Verify product details page displays correct product information	User is on product listing page	1. Open product listing page 2. Select a product (e.g. black t-shirt) 3. Click on the product 4. Compare selected product with displayed product details	Product details page shows the same product that was selected (image, name, and details match)	Product details page shows a different product image than the selected one	FAIL
TC_13	Verify quantity limit is enforced for physical products	User is on product details page (physical product like mug, shirt)	1. Open a physical product (e.g. mug or t-shirt) 2. Increase quantity beyond available stock 3. Try to add to cart	System restricts quantity based on available stock and prevents exceeding the limit	System restricts quantity and does not allow exceeding the available stock	PASS
TC_14	Verify no quantity limit for digital products	Verify no quantity limit for digital products	1. Open a digital product (e.g. vector graphic) 2. Enter very large quantity (e.g. 70000) 3. Add to cart	System allows selecting large quantities without restriction	System allows selecting large quantities without restriction	PASS
TC_15	Verify quantity limit is consistent across application	Product is added to cart	1. Add product to cart 2. Navigate to cart/checkout page 3. Increase quantity	System enforces the same quantity limit as defined for the product	System enforces the same quantity limit across pages	PASS
TC_16	Verify application language can be changed	User is on application with language switch option	1. Open application 2. Change language (e.g. to Serbian) 3. Observe interface	Application language changes successfully	Application language changes successfully	PASS

TC_17	Verify all navigation elements are translated after language change	User has changed application language (e.g. Serbian)	1. Change language 2. Observe navigation menu categories	All elements (e.g. categories like Clothes, Accessories, Art) are translated	Some elements remain in English and are not translated	FAIL
TC_18	Verify color filter can be applied	User is on product listing page	1. Open product listing page 2. Select a color filter (e.g. White)	Filter is applied and product list is updated	Filter is applied and product list is updated	PASS
TC_19	Verify color filter returns correct products	User is on product listing page	1. Open product listing page 2. Select color filter (e.g. White) 3. Observe displayed products	Only products matching the selected color are displayed	Products with different color (e.g. black) are displayed	FAIL
TC_20	Verify selected color filter is shown in the applied filters area	User is on product listing page	1. Open product listing page 2. Select a color filter (e.g. White) 3. Observe the applied filters area	The selected color is shown in the applied filters area	The selected color is shown in the applied filters area	PASS
TC_21	The selected color is shown in the applied filters area	Verify selected color is clearly visible in the filter panel	1. Open product listing page 2. Select a color filter (e.g. White or Black) 3. Observe the visual indication in the side filter panel	The selected color option is clearly highlighted and easy to distinguish in the filter panel	The selected color option is not clearly highlighted and is difficult to distinguish	FAIL
TC_22	Verify filters can be applied and combined	User is on product listing page	1. Open product listing page 2. Apply color filter (e.g. White) 3. Apply additional filters (e.g. size or category)	Filters are applied successfully and product list is updated	Filters are applied and product list is updated	PASS
TC_23	Verify filtering returns all matching products and preserves filter options	User is on product listing page	1. Open product listing page 2. Observe available products (e.g. multiple white items) 3. Apply color filter (White) 4. Compare filtered results with initial products	All products matching the selected filter are displayed and other relevant filters remain available	Only a subset of matching products is displayed and some filter options (e.g. Men/Women) disappear	FAIL
TC_24	Verify user can enter and display valid first and last name correctly	User is on registration form	1. Enter valid first name (e.g. Leonida) 2. Enter valid last name (e.g. Kostova) 3. Submit the form 4. Navigate to user account page 5. Observe displayed name	The entered first and last name are correctly saved and displayed without layout issues	The name is displayed correctly	PASS
TC_25	Verify long name input is displayed correctly without breaking UI	User is on account creation or profile page	1. Enter a very long first name (close to max length 255 chars) 2. Complete registration or save profile 3. Navigate to user account page 4. Observe how the name is displayed	The name is properly displayed (wrapped or truncated) without breaking the layout	The name overflows and breaks the layout; text is not properly wrapped or contained	FAIL
TC_26	Verify system shows validation error when first name exceeds maximum allowed length	User is on registration form	1. Enter a first name longer than 255 characters 2. Enter a valid last name 3. Submit the form 4. Observe validation message for first name field	System prevents submission and displays a clear validation message that the first name exceeds the maximum allowed length	Validation message is displayed only after form submission: "The first name field is too long (255 chars max)."	PASS
TC_27	Verify system shows validation error when last name exceeds maximum allowed length	User is on registration form	1. Enter a valid first name 2. Enter a last name longer than 255 characters 3. Submit the form 4. Observe validation message for last name field	System prevents submission and displays a clear validation message that the last name exceeds the maximum allowed length	Validation message is displayed only after form submission: "The last name field is too long (255 chars max)."	PASS
TC_28	Verify system validates both first name and last name when both exceed maximum allowed length	User is on registration form	1. Enter a first name longer than 255 characters 2. Enter a last name longer than 255 characters 3. Submit the form 4. Observe validation message for last name field	System prevents submission and displays validation messages for both first name and last name fields	Validation messages are displayed for both fields only after form submission	PASS

TC_29	Verify user receives real-time validation feedback when name input exceeds allowed length	User is on registration form	1.Focus on the first name field 2.Enter text approaching or exceeding 255 characters in the first name field 3.Observe whether any limit, counter, or warning is shown before submission 4.Repeat for last name field	System should inform the user about the maximum allowed character length before submission, through inline validation, character counter, or helper text	No indication of the 255-character limit is shown before submission; validation appears only after submitting the form	FAIL
TC_30	Verify system does not allow future birthdates	User is on registration form	1.Enter a future date (e.g. tomorrow) in the birthdate field 2. Submit the form 3. Observe system behavior	System should reject future dates and display an appropriate validation message	System correctly rejects future dates	PASS
TC_31	Verify system does not allow current date (today) as a valid birthdate	User is on registration form	1.Enter today's date as birthdate 2.Submit the form 3.Observe system behavior	System should reject today's date as invalid (user cannot be born today for account creation)	System accepts today's date as valid birthdate	FAIL
TC_32	Verify system does not allow very recent past dates (e.g. yesterday)	User is on registration form	1.Enter very recent dates as birthdate (e.g yesterday) 2.Submit the forme 3.Observe system behavior	System should reject unrealistic birthdates (e.g. minimum age restriction)	System accepts very recent dates as valid birthdates	FAIL
TC_33	Verify system handles extremely old birthdates correctly	User is on registration form	1.Enter a very old date (e.g. 01/01/1900) 2.Submit the form 3. Observe system behavior	System should accept valid historical birthdates within a reasonable range (e.g. up to 100 years in the past from the current date) and reject dates outside this range with a clear validation message	The system accepts birthdates up to approximately 1910 as valid, while dates before this threshold are rejected with an incorrect format error.	FAIL
TC_34	Verify system provides correct validation message for invalid birthdate format vs logical error	User is on registration form	1.Enter a very old date (e.g. 01/01/1900) or recent date 2.Submit the form 3.Observe validation message	System should display a logical validation message (e.g. "date out of allowed range")	System displays misleading format error instead of logical validation error	FAIL
